

Executive Summary

Good progress. The placeholder text is gone, the education section is filled, and the overall polish is much higher. The site now reads like a finished product rather than a work in progress.

What's Been Fixed

1. Placeholder Text Removed

The "Sample bio. Replace this paragraph..." note is gone. The bio now reads as a finished, professional summary.

2. Education Section Filled

The [A short note...] placeholder has been replaced with detailed coursework and honors information.

3. Work Experience Detailed

Both internships (Mafazaa and FlyRank AI) are now fully described with specific technologies and outcomes.

4. Clean Visual Presentation

The dossier format (01/08 through 08/08) gives the site a distinctive, intentional feel. The dark/light toggle works smoothly.

Updated Must-Fix vs. Nice-to-Have

Nice-to-Have

#	Issue	Suggested Fix
1	Certificate clustering	Add a note like "Completed as part of a focused learning sprint" to provide context.
2	"Based in Alexandria, Egypt"	Fine as-is. No action needed.
3	Language section	Already filled with English (Professional) and Arabic (Native).

Final Verdict

The site looks professional and complete. You've clearly put in work since the last review.
